PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in full-stack web development, IoT systems, embedded programming, and AI-driven applications. Developed and deployed projects involving machine learning, automation, real-time monitoring, data visualization, and cloud-connected systems using modern hardware and software technologies. Demonstrated problem-solving and leadership skills through thesis research, hackathon competitions, and independent development projects. Seeking opportunities to contribute technical expertise and innovative solutions in software engineering, systems development, and emerging technologies.
