

LORENCE B. OJALES

+639682313762 | lorence.ojales@gmail.com | lorenceojales.vercel.app | github.com/Rensushii | linkedin.com/in/lorenceojales

PROFESSIONAL SUMMARY

Computer Engineering graduate (Cum Laude) with experience in full-stack web development, AI-powered applications, data analytics, and software engineering. Proficient in Python, JavaScript, PHP, Java, C++, SQL, and modern web technologies. Developed AI-integrated platforms, analytics dashboards, and IoT systems through academic, hackathon, and independent projects. Strong technical writing, problem-solving, and debugging skills with experience analyzing and developing software solutions.

WORK EXPERIENCE

IT Technical Support Intern, JTEKT Philippines Corporation **June 2025 – August 2025**

- Provided technical support and troubleshooting for hardware, software, and network issues.
- Assisted in server monitoring, system maintenance, and IT infrastructure operations.
- Installed and configured computer systems while supporting end users and IT documentation.

PROJECTS

Eco Flow: AI-Powered Smart Greenhouse Management System (Thesis Project) **2025 - 2026**

Technologies: Raspberry Pi 5, ESP32, Python (Flask), SQLite, Scikit-learn, Arduino IDE

- Developed an IoT-based greenhouse monitoring system.
- Implemented AI-powered irrigation scheduling.
- Achieved 94.74% water utilization efficiency.

TugonLipa: AI-Powered Smart Community Platform **Nov 2025**

Technologies: LangChain, RAG, LLM Integration, Automation, Report System

- Developed an AI-powered citizen reporting platform using modern web technologies.
- Integrated AI-based categorization and routing of community reports.
- Designed workflows that automated ticket processing and improved response efficiency.
- Earned 2nd Place in the Hack the Future Smart Batangas Province Hackathon.

NYC Crash Analytics **May 2026**

Technologies: PHP, MySQL, JavaScript, Leaflet.js, Chart.js

- Developed a full-stack analytics platform using PHP, MySQL, JavaScript, Leaflet.js, and Chart.js.
- Built interactive dashboards for filtering, visualization, and geographic analysis of large crash datasets.
- Implemented API integration, automated data processing, and report generation features.
- Applied data analysis techniques to identify trends and support decision-making.

EDUCATION

Bachelor of Science in Computer Engineering (Cum Laude) **2022 - 2026**

University of Batangas Lipa City

Lipa City, Batangas

SKILLS

Technical Skills

- Programming Languages: Python, JavaScript, TypeScript, PHP, Java, C++, SQL
- Web Development: HTML5, CSS3, REST API Integration
- Frameworks & Libraries: Flask, Tailwind CSS, Chart.js, Leaflet.js, Scikit-learn
- Databases: MySQL, PostgreSQL (Supabase), SQLite, MongoDB
- Data Analytics & AI: Data Analysis, Data Visualization, Machine Learning Fundamentals, AI Integration
- Networking & IT Support: Hardware & Software Troubleshooting, System Configuration, Technical Documentation
- Tools & Version Control: Git, GitHub, VS Code
- IoT & Embedded Systems: ESP32, Raspberry Pi, Arduino IDE

CERTIFICATIONS & ACHIEVEMENTS

- Cisco CCNAv7: Introduction to Networks
- 2nd Place – Hack the Future: Smart Batangas Province Hackathon Challenge
- Participant – ICpEP.SE Region IV-A CpE Challenge 2025 (Breadboarding)
- Participant – ICpEP.SE Region IV-A CpE Challenge 2024 (C++ Programming)
